

Dear Commission for Aviation Regulation (“CAR”),

Delta Air Lines, Inc. welcomes the regulatory oversight of CAR and the consultation process for the 2020-2024 maximum level of airport charges at Dublin Airport.

Reflecting on the most recent regulatory period as well as the growth at Dublin Airport Delta is generally supportive of CAR’s proposal to set a price cap of a reduced airport charge. As the next regulatory period also recognizes the embarkation on a very aggressive Capital Investment Programme (“CIP”) of which some projects can support revenue generation and growth we request that CAR not only monitor the delivery against budget and timeline but that CAR ensure that Dublin Airport consult and engage all airline and airport stakeholders effectively to ensure that any changes and prioritization adjustments to the CIP be handled equitably.

Should you wish to discuss our views in any greater detail please let us know.

Thank you.

Best Regards,
Morven
