

27 August 2021
Commission for Aviation Regulation 3rd Floor
Alexandra House Earlsfort Terrace Dublin 2 Ireland

SUBJECT: Response to the Consultation on Draft Performance Plan for RP3

Dear Colleagues,

On behalf of Atlas Air (U.S.A), I would like to present my best compliments to Commission for Aviation Regulation. We have found that operations through your jurisdiction –the gateway to Europe - to be of the highest professional standard for operational efficiency.

We respectfully would like to affirm that we wish this highest professional standard would continue. Irish airspace is critical for our long-haul Trans-Atlantic operation. Irish airspace is the gateway and exit to Europe. Our operations our based on a foundation of safety, compliance and efficiency. Delays often drive compromises that erode all three elements of this foundation. We feel that introducing operational compromises that drive delays, will eventually lead to reduced safety. Our hope is that the NSAs continue to promote an environment that leads to ultra low level delay performance.

Respectfully,

A handwritten signature in purple ink that reads "Gregory Calabrese".
