Subject: Re: Responses to CP5/2004

Dear Louise,

We appreciate the opportunity to give a late response to the above consultation.

Our only comment is in relation to provision of services and facilities for persons with reduced mobility,

and our understanding that the EU commission will shortly publish its findings in this regard and considers that

provision of services for persons with reduced mobility provided to an airport company falls outside of the scope

of the ground handling directive, and should therefore not be considered or included within any proposed airport charges

by Aer Rianta.

Clearly once the commission has published its final decision on PRM's then dependant upon the outcome of the paper,

this may need to be modified.

First Choice Airways has no other comments.

Kind Regards

Eddie Redfern
Group Head of Aviation Regulation
