Re: Coordination Parameters for Summer 2020 at Dublin Airport

Dear Adrian,

The proposed net increase of 4 daily movements may lead to operational delays at Dublin Airport in IATA season S20, and Ryanair therefore objects to this proposal.

There is nevertheless ample room for growth at Dublin airport within the current parameters. See for example the attached report which demonstrates that there is room for significant growth at DUB with the current slots.

Yours sincerely,

Nicola Somers
Scheduling Manager
