## AERODROME INFORMATION - VFR AERODROMES AND HELIPORTS

1. Aerodromes listed in the following pages are licensed by

**Aeronautical Services Department,  
Irish Aviation Authority  
The Times Building  
11-12 D'Olier Street  
Dublin 2**

2. Civil aircraft may only land at an aerodrome subject to the terms of S. I. No. 355 of 2008 Irish Aviation Authority (Aerodromes and Visual Ground Aids) Order and subject to any direction issued thereunder.
3. Endorsed on all licences, issued for all the listed aerodromes, is a condition that "The aerodrome may be used only with the prior permission of the licensee and only so long as the licensee is the occupier of the aerodrome". Aircraft movements at any aerodrome without the licensee's permission can be the subject of a Mandatory Occurrence Report (MOR). The filing of a flight plan does not constitute permission of the licensee to operate to an aerodrome.
4. Operators need to contact the licensee for permission to use the aerodrome and for up-to-date information on aerodrome conditions. It is recommended that prior permission be obtained at least 24 hours prior to the intended operations. Most aerodromes listed are subject to intermittent use and may deteriorate during prolonged periods of disuse, especially in winter. No guarantee can be given as to the suitability of the aerodromes or accuracy of the information given.
5. It is a fundamental obligation on a licensed pilot that he/she should be aware of, and comply with, Civil Aviation regulations, which are designed to ensure the safety of pilots, passengers and the public.
6. A responsibility rests on both the pilot and the aerodrome licensee to ensure that the "Prior Permission Required" condition endorsed on an aerodrome licence is observed.
7. The Geographical co-ordinates of aerodromes published in this AIC do not meet the requirements specified in ICAO Annex 14, Chapter 2 and Annex 4, Vol. I & II, Chapter 2.
8. Aeronautical information relating to Cork, Dublin, Shannon, Connaught, Donegal, Galway, Kerry, Sligo, Waterford and Weston airports is available in AIP Ireland. These airports may be used for VFR operations, subject to the aerodrome operators' conditions being met.
9. Pilots are reminded that refuelling with engines running is not permitted unless the operator is specifically authorised to do so by the Irish Aviation Authority.
