Re: Coordination Parameters for Winter 22

Dear Adrian,

The Commission for Aviation Regulation, by virtue of Section 8(1) of the Aviation Regulation Act, 2001, is the competent authority in Ireland for the purposes of Council Regulation (EEC) No.95/93 (as amended) on common rules for the allocation of slots at Community Airports other than the function of the coordinator. Article 6 of the Slot Regulations states that, at a coordinated airport, the member state responsible shall ensure the determination of the parameters for slot allocation twice yearly, while taking account of all relevant technical, operational and environmental constraints as well as any changes thereto.

Article 5 of the Slot Regulation sets out the tasks of the Coordination Committee which include making proposals concerning or advising the member state on:

- the possibilities for increasing the capacity of the airport determined in accordance with Article 3 or for improving its usage;
- the coordination parameters to be determined in accordance with Article 6;
- all questions relating to the capacity of the airport.

The Dublin Airport Coordination Committee Meeting for the W22 season took place on Tuesday 5th April via Microsoft Teams to discuss the Winter 2022 Coordination Parameters.

The Coordination Committee discussed the Commission's proposal as outlined in their letter to the Coordination Committee dated 28th March 2022 (*Winter 2022 Runway Capacity Limits at Dublin Airport*) to apply no increases to the hourly or 10-minute limits currently in place for Winter 2021, which is in line with the capacity declaration for the Winter 20/21, Summer 2021, and Winter 21/22 seasons where capacity was rolled over from the previous season. There were no objections to this proposal.

Please do not hesitate to contact me should you require any additional information.

Yours Sincerely,

Eoin McGloughlin, Dublin Airport
