

1) Click on "My Account" and "Account Settings".

2) Scroll down and on the right-hand side or near the bottom (depending on your display) you will see "My Profile Signature".

3) With your finger, stylus or pointing device, sign in the area to load your signature. If possible, it is recommended to use a tablet or device with a touch screen. Then press "Save as Signature".

- 4) Once saved, the signature will be blurred for your privacy. You can click in the top right to view it or click "Remove signature" to start again.

My profile signature

You have uploaded a default signature. This can be used where documents need to be signed. If you want to update your signature you can upload a new image

[Remove signature](#)

- 5) Once you have created your Profile Signature, you will then have the option to sign application forms using this Profile Signature directly, avoiding the need to download, sign and reupload a pdf signature page.

Declaration

Please sign your application

Signature

Existing Signature Available

If you have uploaded, and consented to use of, a default signature, you can use this feature to automatically sign this document. You will be shown an image of the signed document before you submit the application.

If you do not have a default signature, or do not consent to its use, you must manually download a signature page below, sign & scan it, and upload it before completing the application.
