### SOURCING OF AIRWORTHINESS DIRECTIVES

The attached schedule lists the current addresses of agencies responsible for the distribution of airworthiness directives (ADs) in the EASA, USA, UK, France, Germany etc.

For aircraft subject to the EASA regulation, since EASA has taken over responsibility for the issue of ADs, the Irish Aviation Authority has withdrawn the D Series Aeronautical Notices that previously provided information on mandatory airworthiness requirements relating to equipment that may be fitted to an aircraft.

For aircraft not subject to the EASA regulation, IAA (Airworthiness of Aircraft) Order, 1996 requires that mandatory continuing airworthiness requirements, such as airworthiness directives, issued by the state in which an aircraft was designed or manufactured, be implemented in relation to any aircraft, including its power-units, and equipment, to which they apply, unless otherwise specified in a direction issued by the Authority.

Registered owners and operators of aircraft are required to ensure they are in receipt of, or otherwise aware of, mandatory continuing airworthiness instructions in respect of their aircraft. This is a legal condition of ownership or operation of those aircraft.

The attached schedule gives links to repositories of Airworthiness Directives. While this schedule was correct at time of publication, website addresses may be subject to change.

This notice replaces Aeronautical Notice A.50 at issue 4, which should be discarded.
