EIDW (Dublin Airport) New Runway 10L/28R

Dublin Airport Authority plan to open a parallel runway (10L/28R) at Dublin Airport in August 2022. Publication of details associated with this new runway will be included in AIP Ireland, effective from 11 AUG 2022

This new runway will become operationally available on a phased basis with departures and arrivals managed during initial operations. Instrument Flight Procedures (IFPs) have been developed to align with these phases of operation and relevant IFPs will be effective from 11 AUG 2022. However, not all these IFPs will be used from this date and operators should check for NOTAM advising on the status of each IFP. In addition, some other IFPs will not become effective until 08 SEP 2022.

A set of supplements to follow this AIC will detail the phased operational roll-out of the new runway and the associated IFPs.”
