

Temporary Airspace Restrictions planned between the 13th to 15th June 2018 due to State security requirements

Due to a planned State security operation, a number of temporary airspace restricted areas (TRAs) will be necessary within the South West region of the Shannon FIR between the 13th to 15th June 2018. No confirmed information is available at this time. Final details of all such TRAs will be promulgated by NOTAM, and separately on this website as soon as possible. Pilots should check in advance for this information prior to undertaking any flights within the Shannon FIR between the dates listed above to ensure they do not infringe any of these TRAs.
